My HP Photosmart M737 camera's wrist strap eyelet broke so I designed a 3D-printable replacement. You'll need some longer screws to fit this replacement. I used 5mm long plastic screws.

Recommended Print Settings:

- ASA or heat resistant material
- 0.1mm Layer Height
- 4 walls
- 100% Infill
- No Supports

Installation Instructions:

1. Unscrew the four case screws.
2. Align the replacement part and screw it down with the longer screws
