Meet the adorable Spirit Puppy, a charming 3D printable flexi toy with a cute ghostly appearance! Featuring a sweet puppy face, floppy ears, tiny paws, and a long articulated body, this playful design is perfect for bending, posing, and fidgeting. Its flexible segments make it a fun desk companion, a unique collectible, or a delightful gift for dog lovers. Perfect for Halloween, spooky cute collections, and anyone who enjoys adorable articulated 3D printed toys! --- I test all my models with default Bambu Lab slicer settings: 0.2mm layer height, 10% infill, tree supports. No complex tweaks needed. If a model requires special settings, I include a prepared 3MF file (rare).
