Summary

Insert for the back of the Steam Deck Carrying Case (LCD Version)

[Gadgets](#) > [Video Games](#)

Tags: [steam](#) [charger](#) [adapter](#) [usb-c](#) [insert](#) [deck](#)
[usb-charger](#) [steamdeck](#)

NOTE: This was designed for the charger that comes with the Steamdeck LCD. The charger that comes with the Steamdeck OLED is longer and may not work with this accessory!

Not so much a remix but a reimagined insert for the back of the steam deck carrying case that winds the USB-C brick cord and neatly tucks it away.

-Holds 4 Full sized SD cards; basically every microSD comes with an adapter, so I plan to hold the microSD cards in the adapters during storage so they are less likely to get damaged.

-Slight press fit at bottom of the SD card slot so they don't fly out when you go to unwrap the charger

- No lid, just wrap the cord around the body of the insert and stick it under the elastic.
- Designed so the cord can wrap clockwise or counterclockwise.
- Supports modeled in so they should break away clean and easy
- Also a version with No-Supports so you can add your own

REMIX!

I haven't printed this one myself but by the looks of it [This Remix by Dave](#) that incorporates a stand and uses Micro-SD instead of standard SD slots appears to work for the EU and the US plug without issue. Might be worth checking out!

HEY!

If you like this accessory check out my [Steam Deck Charging Dock](#). It uses the charger the Deck comes with and makes it super quick and easy to plug in and store the deck so its always charged when you want to play. I barely use my case anymore.

This remix is based on

NEW VERSION 3.5 with XL Lid: Steamdeck USB-C Charger Cradle (for USA plug only)

by JordanK
