Update 19-Nov-2024 : Added IL version

Update 02-Apr-2024 : Added CZ version

A removable trolley coin for EU/US/CA/AU/UK/CZ/PL/IL carts. This allows you to remove the coin after unlocking the trolley for your shopping.

Although there are several designs out there, I wanted to design a version that it is more robust and does not break easily.

Print settings :
Print with 3 perimeters
20% infill

PLA will work unless you expose it to the car's heat during the summer. Otherwise, use PETG.

NOTE : I can only test the 1 Euro version, all other iterations are in BETA, until someone confirms that they work.

You can always request a coin that is not included in the collection.
