updated 12. 4. 2022 | published 8. 2. 2020

Summary

This is a splash guard – an additional part for @ulitiy's nice floater for the ultrasonic mist maker.

This is a splash guard – an additional part for @ulitiy's nice floater for the ultrasonic mist maker. His floater is not included; you have to download it here:

<https://www.thingiverse.com/thing:3900020>

... or you can download this remix:

<https://www.prusaprinters.org/prints/20579>

The splash guard is very lightweight (approx. 17 grams) and it is a tight fit. However, the legs bend easily, and you can adjust the distance to the floater quite a bit.

OpenSCAD source files are included.

Print instructions

I printed this with PETG on the textured PEI sheet, and used “Archimedean Chords” as the bottom infill pattern. I have not tried it yet, but a translucent material should look nice too. :)
