### Summary

A laptop stand that puts the screen up higher and frees up your desk space.

Tags: [stand](#) [laptop](#) [deskorganizer](#) [vertical](#)

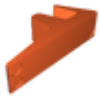

This is a laptop stand for use when your laptop is docked. It stands it upright, so you can use the laptop as a second (or third) monitor without it being lower than your other screens.

This also gives the laptop a much smaller footprint on your desk, and allows the underside to breathe much easier.

You may notice that the leg is asymmetric, so if you're like me and want symmetry then mirror the print in your slicer. I'd also suggest a thick shell, and minimal infill. The top and bottom are what are going to give this stand strength.

Enjoy!
