If you ever wanted a printable and accurate model of your favorite nozzle.

Then here is your chance.

In order to make it easy to print without support. I changed the angle of the thread from 60° to 70°. If you prefer a accurate model. I include the 60% version too.

I designed this just for fun.

The one on the picutes is scaled up to 2055%. Thats the max what fitted on the buildplate of my MK3.

Hope you like it :)

## Print Settings

### Printer Brand:

Prusa

### Printer:

i3 MK3

### Rafts:

No

### Supports:

No

### Resolution:

0.2

Category: Props
