Summary

I needed a way to mount my synthesizer keyboard onto the front of my rack storage unit and this what I came up with.

Designed for use with 16mm curtain rod, the brackets drop right onto your racking shelf unit and you can use the slider models to mount a shelf on top or just use them as I have as two supporting points for whatever you sit on top.

The little nubbins that slot into the rack I originally got from Thingiverse, but I hunted high and low and sadly couldn't find them to give credit.
