This is my remix of the Pi cutter

It uses the latest snapshot version of openscad so be warned.

Why ? because it has the text feature that means u can convert any font into a cookie cutter woohoo

And also make even more PI

Instructions

Use any font u like but the result will not always be useable right away

It also work with font fontawesome, just convert the symbols to there unicode version <http://fontawesome.io/cheatsheet/>

see the scad file for an explanation

But not all letters will work because of their complex shapes (see the linux "cutter").

Category: Kitchen & Dining
