Micro SD Card Remover. Designed for the Gopro Hero 8, can also be used for other devices. The Gopro has such a thin slot for the Micro SD card that I can't remove it with my sausage fingers. Therefore, I have modified my potato chip grabber. Now the SD card can be removed with it:

1. press the SD card slightly inwards until the locking mechanism unlocks the card and it pops out a little.
2. push the flat tip of the SD card remover behind the card and squeeze the pliers. Slowly pull out the card.
