No Amiga A500 was complete without a load of floppy disks scattered over the top ready to play.

Therefor I designed a full-scale miniature floppy disk for the A500 Mini along with coloured blank disk labels.

The Model is split up into two models for dual colour printing, print each model in your desired colour and simply glue together.

Hope you enjoy, and please share your makes Thanks.

If you have any questions, please feel free to reach out to me.

Printing Instructions:

There are no special printing requirements.
