This revolver cylinder pen holder is ready to hold all your precision writing instruments and keep them on target for all your paper slaying needs.

The standard model has 13mm holes for your normal pens and pencils.

To get the model to spin you will need a standard skateboard bearing.

You can also print just the cylinder.

I suggest that you use the 3MF files to print the models, I have included files for the Prusa Mini and MK3. The MK3 3MF also includes my Blob free start up profile.
