This was a very basic table for any RPG, such as Dungeons and Dragons, Pathfinder, etc. Then an epic battle was fought in the room it was in and the table became collateral damage.

It measures 1 inch by 2 inches and is to scale for miniatures of that size. It only uses 2.2 meters of filament, so it can be a great addition to your game from what would otherwise be scrap filament.

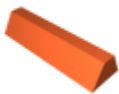

It comes in three parts: a left piece, right piece, and connector piece. They should fit together with minimal post processing. They will need supergluing into the configuration shown in the cover photo. I would recommend sanding and/or microfiling (or washing, if applicable) this before painting. The lines still show even with painting.
