[Hobby & Makers](#) > [Other Ideas](#)

Remix of @leitefrog's remix of @AutopsyTurvy's claw and ball foot. Made this one smaller to fit a regular, regulation, 40mm squash ball since the original was made for an odd 42mm ball. Also made the base smaller but thicker.

Truthfully, though I love the look and they function, if you like to move your printer around at all, this design isn't the best. Any rolling torque (as in just sliding the printer) will dislodge the balls and potentially puncture them with the claws of death.

This thing was made with Tinkercad. Edit it online <https://www.tinkercad.com/things/5mSkgborRB>

Print Settings

Rafts:

No

Supports:

No

Resolution:

20mm

Infill:

20%

Notes:

Nothing special, here. Easy to print. Just make sure to use 4+ walls on all sides for strength.

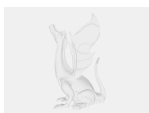

Category: 3D Printing
