[Household](#) > [Kitchen](#)

Small and simple print to keep your spoon, or other utensils, from falling into your frying pans.

I added the fusion file so you can easily tune it to fit your spoons. Just update the parameters:

- Depth: thickness of the spoon
- Width1: smallest width of the spoon
- Width2: widest width of the spoon
- Height: height between the smallest and widest part of the spoon you used for width 1 & 2
- Thickness: thickness of the printed part
