Inspired by two of my favorite designs: the [finger chopsticks](#) by [calvindonger](#) and the [bag clip](#) by [neoyarus](#), I decided to make a single device that combines both functions. This is the result.

Can be used to clip the bag of your favorite snack closed for freshness and, when snacking, doubles as finger chopstick to avoid getting crumbs and oil on your mouse, keyboard, and touchscreen.

Print at 0.2mm layer height for the print-in-place function to work properly.
