---

This mount attaches to the side of the Y-Axis Gantry plate and allows more space for the terminal strips. The terminal strips are connected to the 2 Y-Axis and single X-Axis motors. This allows cleaner wiring to the GRBL Shield.

The slots in the base are so the wires can be secured with cable ties.

### Instructions

I printed this on the Replicator 2x with the following settings:

Infill = 15%

Shells = 2

Layer Height = .30

Build Plate Temperature = 115

Raft = yes

Support = yes

Extruder Speed = 90 mm/s

Travel Speed = 150 mm/s

Category: Electronics
