Summary

this model has working arms and tools that can be socketed into the hands

[Toys & Games](#) > [Action Figures & Statues](#)

Tags: [minecraft](#) [figure](#)

the model is a simple minecraft template which you can customize yourself, simple with ball joint arms for 360 degree turning around the hinge.

i have no idea if there are any specific setting in place as i printed mine with 0.2 layer height 20% infill and a brim (Voxalab Aquilla Printer was used)

after the print is done place the female connection into the body and the male connection of the joint into the arm, if press fitting doesn't work then sand and use a strong glue to hold it into place.

paint your model up and done you have a little minecraft character
