updated 6. 2. 2024 | published 18. 3. 2023

### Summary

A simple Vive Tracker mount made out of TPU and a generic 1/4 camera thumb screw.

[tundratracker](#) [fbt](#)

This thing can clip on whatever it fits really, Belts, Sandals, Shoes, I even mounted one of my Lighthouses with one!

I lack the skill to make a print in place hinge so print this in flexible TPU as the hinge simply folds open.

Prints in place as a single piece on it's side.

Support recommended for the versions with pin.

Uses generic 1/4 camera thumbscrew that can easily be purchased from Amazon or Aliexpress.

# Model files

## **auxvr\_trackattachv2.stl**

☐ Regular model with added space to be able to unscrew

---

## **auxvr\_trackattachnopin.stl**

☐ No pin, can easily be unscrewed

---

## **auxvr\_trackattach.stl**

☐ Regular model, no holes on the side, hard to unscrew with the pin.

---

## **auxvr\_trackattachlong.stl**

☐ For use with wider belts, optimal size for the Woojer Strap

---

## **auxvr\_trackattachshort.stl**

☐ For use with smaller belts such as the top strap of a Pico 4 HMD
