This fits the Phillips Norelco 9000 Multigroom series wide T-Head trimmer but it may fit others. I've been looking for one for awhile so I decided to modify a regular head and I needed to widen some and remove other combs/fins to make it strong enough to work. So I ended up printing mine out of Duramic PETG. I ended up printing it upside down with supports touching the build plate.

3000 series and 7000 series as well?

This is where the design started <https://www.thingiverse.com/thing:4099410/>

Because the longest guard with the kit is 19mm!

If you print it please post!!!

Print Settings

Printer Brand:

Creality

Printer:

Ender 3

Rafts:

Doesn't Matter

Supports:

Yes

Infill:

100

Filament:

Doesn't matter PETG

Whatever

Notes:

I printed it upside down with fins up so I wouldn't have to clean support material out of them. I also used a small eraser around the rear catch so I wouldn't rip it off when removing supports. I highly recommend doing this!
