This is a way to hold an extra ford 5 button Key Copy on a peg or nail. I believe they were made from 2011 to 2015. Mine is from a C-Max but I'm sure they used them on most of their vehicles during this period. I know the print quality stinks but I'm hanging it on a wall. Printing takes less than an hr or so w 25 percent infill or less. Ford BT4T-15K601 is the type of key fob I believe.
