[Household](#) > [Kitchen](#)

This is a bracket for the Dose Cup on a DF-64 grinder which has been adjusted to level the cup out when the grinder is on a 10 degree tilted base.

The bracket has small lips at the outlet to prevent the cup rotating or sliding out easily due to vibrations.

You can use this with a portafilter as well, but the spacing is tight.

This is my 5th version trying to get it right. I think I did this time.

Print Settings

Printer Brand:

Crealitiy

Printer:

Ender 3

Rafts:

No

Supports:

Yes

Resolution:

200

Infill:

15

Filament: generic PLA Black

Notes:

I used tree supports for the screw hole as they work perfectly and pull out cleanly.
