My Dometic RML9330 Fridge Door Lock internal connector has broken and the little return spring.

The spare part was found for £113.99, I thought I had to try build a replacement part myself.

Parts need to be cut in the half for printing. I just glued together the spring retainer to ease mounting.

With this design, there is no need for the little return spring.

Check <https://www.veleton.com/dometic-9-series-fridge-catch-replacement-rml9330/> for fridge dismounting instructions
