Summary

Print enough slots to suit your knife organization

[Household](#) > [Kitchen](#)

Tags: [knife](#) [drawerorganizer](#) [knifeblock](#)

Please post your make with pics
Save yourself \$28 - 79 and hit print!

Links snap (friction fit) into place, no need to glue.

Use the .3mf file or print them standing upright, not on their side (you might have problems with the friction fit of the links if you do).

Print the link file to match the number of slots you plan to print.

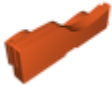

I recommend using variable layer height with 3 parameters and minimal infill.
