### Overview

Toothpaste squeezer to help get that last bit of toothpaste out of the tube. I've personally printed a couple for around the house. I've even had one get warped after going through the clothes dryer but it still gets the job done. They're simple and work great!

5/22 - updated to make the slot smaller for better functionality

### Printing

No supports necessary and under an hour print time! I printed using marble PLA on the Prusa i3 MK3.
