This is a collection of parts for the 3DSets.com 4x4 RC Jeep that I modified for MMU printing. This collection ONLY contains the parts I modified:

Taillights (Left & Right) - 2 colors

Steering Wheel - 2 colors

Front Panel (w/ Jeep Logo) - 2 colors

I have included the .3MF files as well as the .stl files.

Note: The Taillights has two parts: 1) MMU part (Brake light cover/Light mount) and the reverse light. The reverse light I printed in semi-clear PETG and then inserted into the actual taillight assembly.

The 4x4 Jeep was a really cool project (my first RC project as well as my first project that had so...many parts!!! But well worth the time. If you

have some time, filament (and of course money), I would highly recommend this project!! <https://www.3dsets.com/>

Print Settings

Printer Brand:

Prusa

Printer:

MMU2s

Rafts:

No

Supports:

No

Resolution:

.2mm

Infill:

20%

Filament: AmazonBasics, Solutech PLA Black, Red, Purple, SemiClear, Post-Printing =====

Other than pushing the backup lights (semi clear) parts into the taillights, none.

How I Designed This

I did not design the original parts, I simply modified them to meet my needs.

Category: R/C Vehicles
