This is a WIP - working on updating the pieces that don't print well

What Changed?

- Zipper pull- removed details from the back, made one solid piece. The original can move however it is very weak and needs supports to print
- Bead KH2: Separated so individual beads can be printed
- Dangle: Remodeled the top half of the bead to resolve all the mesh errors, split the cap so it can be printed upside down easily

Print details:

- Zipper pull- .05 mm, no supports, grey is coated with one coat of filler primer
