Tags: [extrudervisualizer](#) [visualizer](#)

Here's a fun extruder visualizer that looks like a tractor tire. The "P" is for Prusa!

I tried some different color combinations and like the black/white/orange. Prints with no supports. I printed all pieces individually. The "P" presses into the wheel snug and won't come out. I then glued the wheel inside of the tire.

You'll need an 8x3, or other 8mm diameter magnet

Please click the Like button and post your make if you print one.

Thanks,

Jake
