Tags: [baratza](#) [bellows](#) [vario](#) [forte](#)

This is a single dose hopper for the Baratza Vario/Forte coffee grinders. It uses a rubber grinder bellows commonly available on AliExpress (with an aluminum lid) that performs very well to blow all the grinds out of the grind chamber.

I believe this should be compatible with the Encore, Virtuoso+, Vario and Forte grinders.

NOTE: The hopper should be printed upside down, i.e. the part holding the coffee beans facing the build plate. I would suggest printing this in food-safe PETG if you are concerned with such things.

Both tabs on the lower part of the hopper have sloping tops to simplify printing without supports. These will have to be filed or

trimmed down to fit the grind chamber. The gap between the tab and the step should be around 2.7mm, as shown in the pictures above. Don't remove too much material, as the hopper won't lock into the grind chamber.
