Summary

A shelf for small homes and offices

This is a work in progress, I have been working in it for some time now. It will take me a few weeks to finish it, so please, forgive me.

It is a small shelf (0,7 x 0,6 x 1,9 m), with 3 levels. The middle bars are for resistance.

It has 2 locks that you must fit to a wall.

Also, has some magnetic supports for 1 or 2 acrylics at the sides.

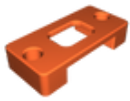

Finally, it has supports for tools, alcohol, etc.

The upper level is thought for storing filament, but you can place a printer also as I did, but it is hard to reach it and you will need a stair.

I share the editable files, I didn't finish this project on time, so I hope, this files help me in explaining myself better.

Happy printing.
