## Summary

A replacement threaded stand rod for a digital photo/video frame.

I bought this digital photo/video frame from Amazon, as a way of showcasing my YouTube videos along with my models: <https://amzn.to/3MipBQE>

Some child decided to run past my table, knocking over the display. Fortunately the main unit survived, but the original threaded stand broke where it screwed into the body.

The original threaded rod was able to be repaired with superglue, but I decided to design and print a stronger replacement.

For your convenience, the model is rotated horizontally to give the best results for the threads - and the stand should be a lot stronger for it.

If this helps you out, feel free to show some love.
