Summary

1/4in socket adapter I designed to hold a socket for screwing the nozzle on and off my printer.

Made to fit a socket i had that was the right size for taking the nozzle in and out.

its 1/4 in drive and has an inset again designed for my socket some remixing may be needed for other sockets I'm not sure.

Just a straight forward adapter to allow me to get some grip on the socket there is no torque mechanism or anything.

No supports needed
