updated 21. 2. 2023 | published 21. 2. 2023

Summary

Mounts to hold various ratchets and extensions. Also works with Tekton's 3/8" Comfort Grip ratchets.

[Hobby & Makers](#) > [Tools](#)

I built this to use on my French cleat wall. There was not a magnetic organizer that exactly fit my Tekton socket set, so I made one.

This corresponds with my socket organizers, linked below:

<https://www.printables.com/model/163236-magnetic-socket-organizer-for-the-tekton-skt15311->

I printed these on my Original Prusa Mini with 25% infill, 4 perimeters and 4 top and bottom layers using PLA.

I got my inspiration from a video from Woodworker Anonymous on YouTube: <https://www.youtube.com/watch?v=L8QCourD8N0&t=676s>

2 of these magnets are used in each hole: <https://amzn.to/3FVEia8>
