### Summary

refile the tube that holds your solder

2.03 hrs

1 pcs

0.16 mm

0.40 mm

PLA

10 g

Creality  
Ender-3

[Hobby & Makers](#) > [Tools](#)

I get asked to fix electronics by family every now and then. I like to keep my soldering kit compact.

So I made this little tool to help wind solder and reload my travel solder tube, it can also just hold the solder by using the hole at the tip.

It uses little filament, and prints quickly, pop a bit of filament in at the hinge pin, and it's good to go.

No support or brim is needed.
