Minimalist paste pusher design that's plenty strong! Works great for other things like facewash, lotion, etc.

The opening is 62mm wide. If you need a different size [check out my other model that has lots of other size options](#). Although a larger size will work fine, I personally like getting it as close as possible.

Takes 2.3 grams / 0.78 meters of filament if you print with 5 walls - so even less if you choose to do infill instead.

The squeezing mechanism is based on @makeplace's [Paste Pusher Animals](#) design on Thingiverse. My design is built around that opening.

Interested in the same mechanism but something more fun? My kids love my [Totoro toothpaste squeezer design](#):
