I extended the mount by 50mm in both directions to get more of the build volume into the shitty FOV of my cheap webcam. Also I made a bigger platform for the webcam because my old one was too small for my webcam to wrap around. You can mount (and turn) the platform by using a M5 or M6 by 10-20mm Srew and nut.

With that size its a little bit flimsy but seeing something is better than seeing almost nothing. It does its job.

I hope this helps someone! Leave a comment and post a make if you liked it!

Print Settings

Printer Brand:

Creality

Printer:

Ender 3

Rafts:

No

Supports:

Yes

Resolution:

0.2
