### Summary

If you have broken your car's carpet locks this item is for you.

[Hobby & Makers](#) > [Automotive](#)

Tags: [fiat](#)

You need to print the two parts and then screw them together by taking advantage of the threading, threading the mat into the center (like a sandwich).

This object was made by exploiting the floor mats of a Fiat Panda (2012-) but you can find also the file .ipt that can modify for your car.
