Summary

Luggage tag style holder for Apple AirTag

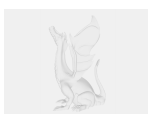

[Gadgets](#) > [Other Gadgets](#)

Tags: [apple](#) [luggage](#) [luggagetag](#) [airtag](#)

I was looking for a way to attach an Apple AirTag to my luggage however couldn't see something I liked...so I made my own! This is my first attempt at creating a 3D print, any refinements would be greatly appreciated :)

Comes in two parts, base and cover. The AirTag fits into the base and the cover is attached with 4x 3M bolts/nuts. There is a small recessed section to add a label with any other information you wish.
