Summary

Replacing the stock spacer with this spacer should make the pocket clip a little less tight/aggressive.

I bought a Kershaw Amplitude 2.5, but I found the pocket clip a bit aggressive. I ended up replacing the stock clip spacer with this one (which is .5 mm thicker), and now things are a little better.

Printed at 100% infill, only takes about 5 minutes.

Takes 0.08 meters of filament, cost is about 1 cent.
