All in one stand and charging unit for any version of fitbit watch where the magnetic charging plug is at the bottom of the watch.

I designed it so you have a light friction fit on the mag charging plug, this i found allows a better connection.

The cable feeds nicely thorough the holes , plus can be used as a cable tidy when travelling - but mine is great for just sitting on your bedside table.

(Please forgive the 3D print in the picture - It's before I upgraded my extruder to dual gear. The skipping caused all the gaps - the stand still works so didn't want to waste it)
