updated 16. 5. 2022 | published 16. 5. 2022

Summary

Adds a faceplate to the DG2470 so you can mount it in your 19" Server rack.

This is a WIP.

This print will add a faceplate to a Arris DG2470 Cable modem so you can rack mount it. It has a window so you can still see the LEDs on the front of the cable modem.

This will be my first upload and first functional 3D Print. All measurements were taken with a digital caliper in mm. I am printing the middle model file currently and will update this and the models as necessary.

Thanks for checking it out!
