### Summary

I made this LED holder for my Alfawise U30 hotend that is modified with <https://www.thingiverse.com/thing:3140632....>

I made this LED holder for my Alfawise U30 hotend that is modified with <https://www.thingiverse.com/thing:3140632>.

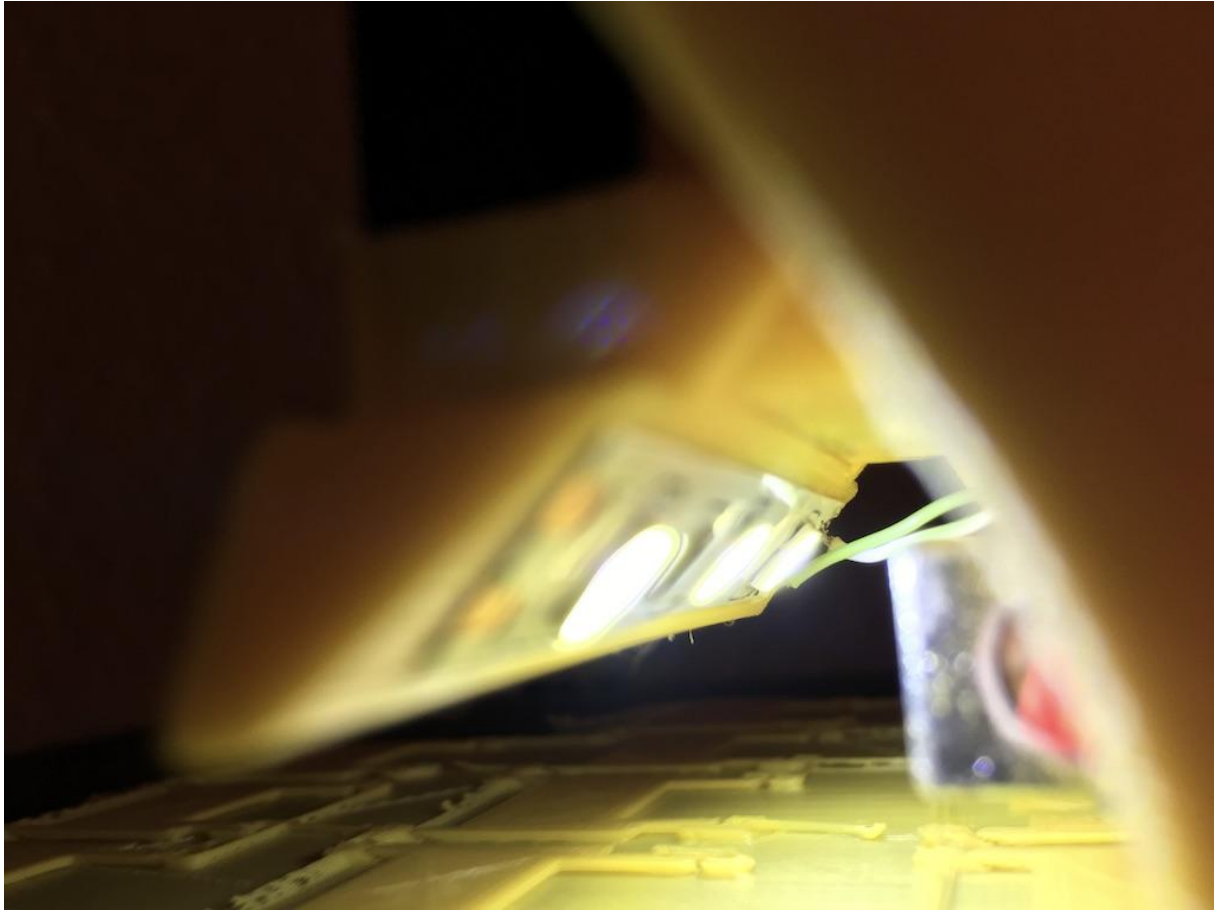

Created for an extra bright 5cm cold white LED strip with 12 Volts. For 12 Volts I bought an DC-DC Converter and used the 24 Volts from Hotend cooling fan.

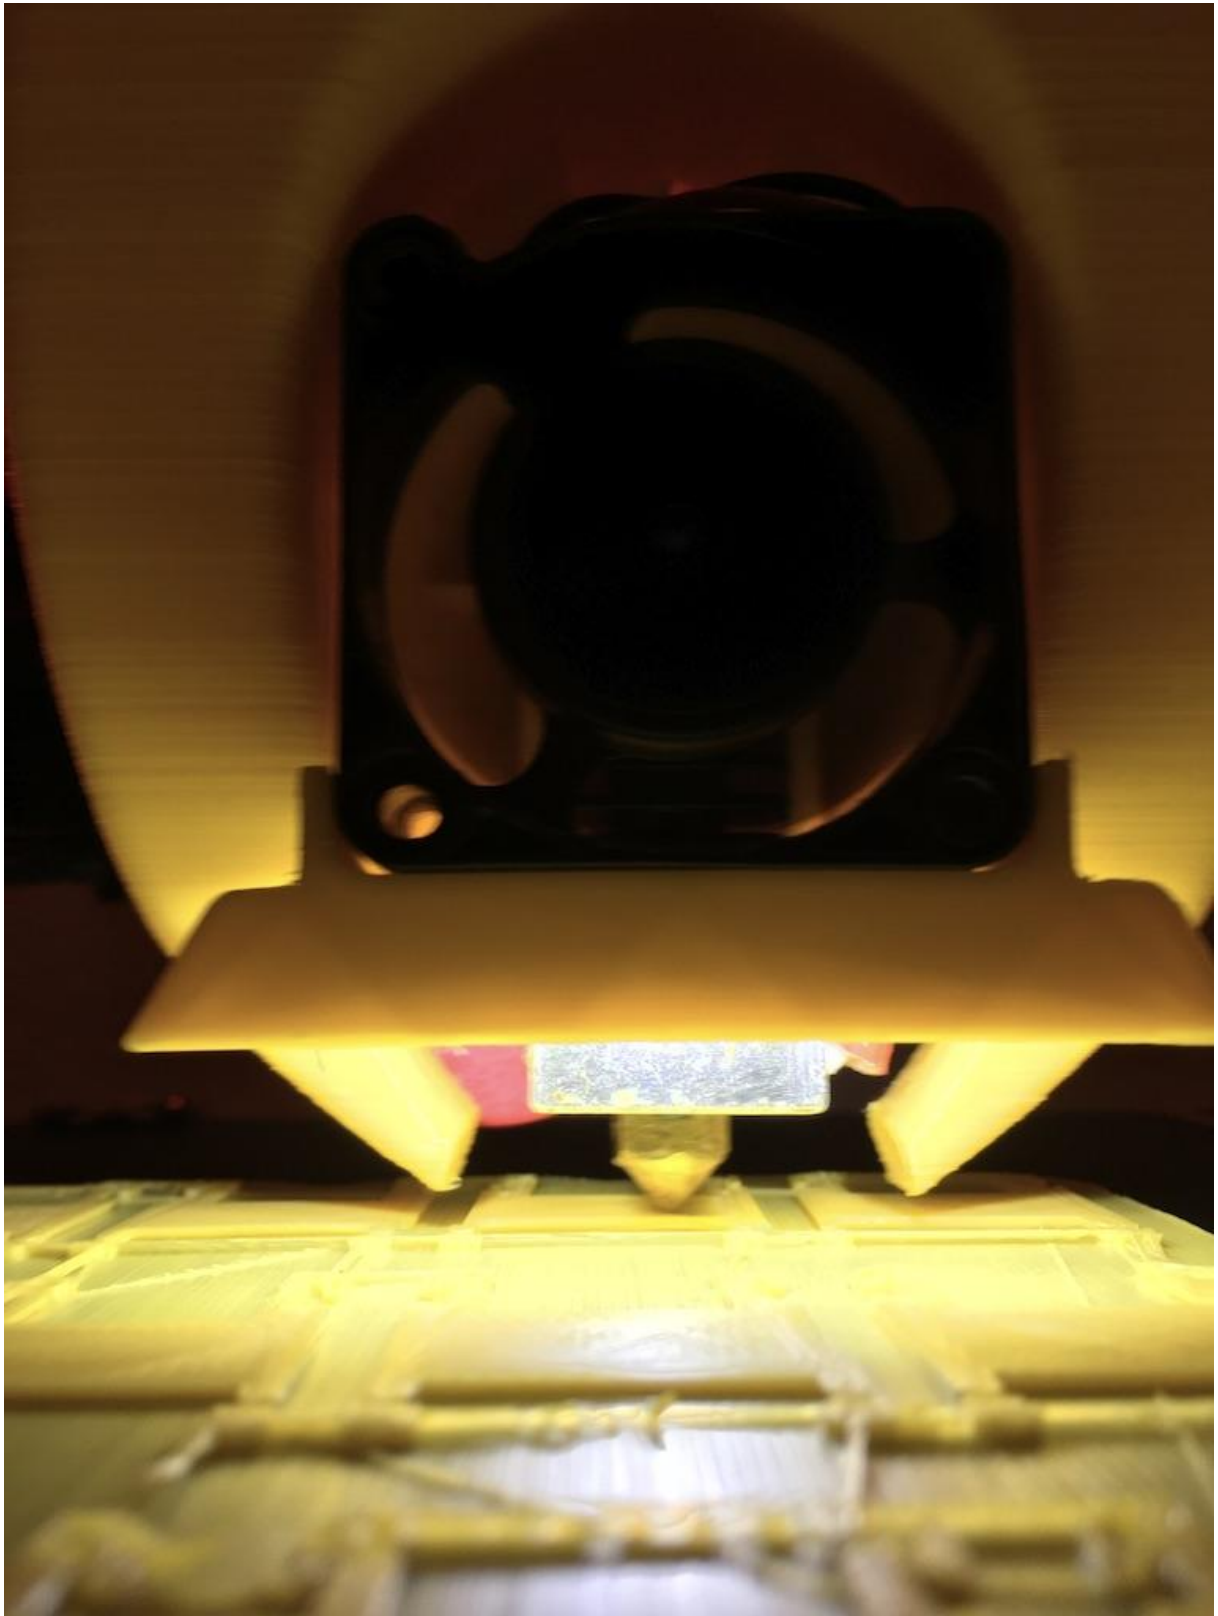

Fan is the original Alfawise U30 Partcooling fan with 40x40 mm.

Update 5.5.2019

I made a update with fan holder for easier replacement.
