[measurement](#) [rule](#)

A 170mm ruler , designed as it was the one thing I dont have in the house and I needed one.

There is a series of holes in 10mm increments, can be used as a crude compass with the aid of a drawing pin.

Measurement is fairly accurate , all depends on your printer I suppose.

easy print takes 1hr 40 minutes on my Ender 3.

0.2mm resolution, 20% infil , no support , no adhesion.
