This is a fun little fishy that can be printed as a keyring, pendant or earrings on any printer.

to print on an FDM printer (filament), I recommend printing at a higher resolution for the best results. I printed mine at 0.12 mm layer height with a standard 0.4 mm nozzle and the text was visible, but be sure to check your slicer render to insure best results. keyring size took about 30 mins on my ender 3 at these settings.

Please Like and post makes to show your support. Give me a follow If you would like to see more fun prints like this.
