Summary

Two opposite-handed helices that appear to flow when spun.

This is based on this Reddit post: <https://tinyurl.com/2p9c6m6n>

It's necessarily incomplete, but it demonstrates the idea. Feel free to add a loop to string it up, or a bearing base to spin it around. This will probably not be developed further on my end.

Modeled in Rhino 7, mostly because it's quick and easy to achieve G4 continuity for a freeform tchotchke like this.
