### Overview

I remixed acorderob's tool holder for the Prusa i3 MK3 & MK2/MK2S so that it could hold my assortment of 3D printing tools. There is a place for the following:

- Prusa i3 MK3 kit tools (including the glue stick and lubrication tube)
- E3D Nozzle Fun Pack plus tools
- Wire snips
- Assortment of 3x wire brushes
- Small ruler

See the included pictures for details on where each tool fits.

## Printing

You will need supports for the section that overlaps on the printer PSU. I printed using PLA on the Prusa i3 MK3. I would also recommend applying some glue to the print bed since the print time is a little long and the bottom layer covers most of the print bed.

Please like it if you do and leave any comments!
