## Summary

extruder-idler-mm2s\_remix

[3D Printers](#) > [3D Printers - Upgrades](#)

It is difficult to shape the tip of the extruder-idler used in mm2s, and it is a part that has been shaped on the data so that it can be used without processing.

I made several patterns of the shape and length of the tip part, attached it as it is, and it can be used without scraping (the chimney part was fixed by pressing it to the outside).
