### Summary

Lcd sun protection for canon c70

[Gadgets](#) > [Photo & Video](#)

Tags: [canon](#) [lcd](#) [c70](#)

Print vertically from the side to get max strength and put two screws to block the two pieces together

Print Options:

- PLA very clean results, quite robust but might suffer high temperatures and deform
- PETG very robust less clean results but can stand high temperatures under the sun

print preferably with light colors with PLA while PETG can be printed also black.

Hint

if the fit is a bit loose put a piece of electric tape behind the lcd support to have more grip
