Container for holding diabetes testing equipment. Slot on side for attaching belt clip (clip from Minimed 630G). Three partitions in the holder. The first slot holds a Contour Next Link Meter, the second slot holds lancet device, the third slot holds test strips. The third slot is sized to hold two test strip containers from Diabetes Test Strip Container. <https://www.printables.com/prints/207241-diabetes-test-strip-container>

The belt clip is held in place with two 3mm diameter by 4mm long set screws.

The lid has print in place hinges and snaps shut.

Use supports for the lid when printing.

PETG was used so that if the container was left on the dash of a car and exposed to hot environment it would not melt or distort badly.
