Updated to have better socket retention and more solid clip engagement.

This is an ATX 24 pin bulkhead pass through for the Thermaltake Tower 900 case. For securing ATX 24 extension cables.

The rubber grommets from the Tower 900 case can be removed and replaced with this bulkhead grommet insert. The insert is designed to accept a female ATX 24 pin extension socket, snapped in from the motherboard side. It results in a super clean look for next level cable management.

CPU and PCIE passthrough bulkheads grommets coming soon.
